

La Lumière Effacée

Lyric Book

01 — Allumée (Lit)

Original Lyrics

Je Laisais La Lumière Allumée
Je... Laisais
La Lumière

I.. Am Still
..
I

Je Restais
Sans Rester
Je Restais

On Disait Dormir
Mais Rien... Ne Cessait

Je Laisais La Lumière
Allumée

La Lumière Restait
Je... Restais

I Am Still

Left On

La Lumière

I Am Still
Left On

On Disait Que Ça Restait
Ou... Restait

I.. Am Still
..
I

Je Laisais...
La Lumière

On Disait...

Je... Restais

I.. Am Still
..
I

English Translation

I Left The Light On
I... Left
The Light

I.. Am Still
..
I

I Remained
Without Remaining
I Remained

They Said It Was Sleep
But Nothing... Stopped

I Left The Light
On

The Light Remained
I... Remained

I Am Still

Left On

The Light

I Am Still
Left On

They Said It Remained
Or... Stayed

I.. Am Still
..
I

I Left...
The Light

They Said...

I... Remained

I.. Am Still
..
I

02 — La Piste Sombre (Dark Path)

Original Lyrics

la piste sombre
sous la lumière
la lumière reste

We weave a dark path

We weave a dark path

la piste sombre
sous la lumière
la lumière reste

Dark path

English Translation

the dark path
under the light
the light remains

We weave a dark path

We weave a dark path

the dark path
under the light
the light remains

Dark path

03 — Le-loomi-nai (We Are Seen)

Original Lyrics

je te vois sans visage
tu bouges — je reste là
dans la lumière qui tremble
tu mens — je n'entends pas

plus rien à cacher
plus rien à nier—

lé—loomi—nai

dévoilée
we are seen
lé—loomi—nai

à nu
we are seen

on disait que ça passe
mais rien ne s'efface
je te vois encore
quand tout se casse

plus rien à fuir
plus rien—

lé—loomi—nai
dévoilée
we are seen

English Translation

I see you without a face
you move — I stay there
in the trembling light
you lie — I do not hear

nothing left to hide
nothing left to deny—

lé—loomi—nai

unveiled
we are seen
lé—loomi—nai

laid bare
we are seen

they said it would pass
but nothing is erased
I still see you
when everything breaks

nothing left to flee
nothing—

lé—loomi—nai
unveiled
we are seen

04 — Libre (We Are)

Original Lyrics

on a laissé la lumière
on a laissé tout derrière
on disait rester
mais on est partis
je te regardais
tu ne disais rien
I'll leave you on!

plus rien à tenir
plus rien à cacher
In the time we had..oh
on voulait partir
sans se retourner
In the time we had..oh
we lost our need!

libre...we are free
libre...encore...
we are free

on ne revient pas
on ne revient jamais
on disait rester
mais ça s'est effacé
je te reconnais
mais tu n'es plus là

plus rien à garder
plus rien à sauver
on a tout laissé
sans se retourner

libre...
we are free..
libre...reste encore...
we are free

English Translation

we left the light
we left everything behind
we said we would stay
but we left
I was looking at you
you said nothing
I'll leave you on!

nothing left to hold
nothing left to hide
In the time we had..oh
we wanted to leave
without looking back
In the time we had..oh
we lost our need!

free...we are free
free...again...
we are free

we do not come back
we never come back
we said we would stay
but it faded away
I recognize you
but you are no longer there

nothing left to keep
nothing left to save
we left everything
without looking back

free...
we are free..
free...still remaining...
we are free

05 — Le Livre des Morts (Book of the Dead)

Original Lyrics

am I
je suis vivante
alive?

plastique
mon corps

electronic
suis-je ?
my
body

je suis vivante
suis-je
am I alive?

plastique
mon corps
suis-je

électrique
mon corps
suis-je
my body
(electronic)
my body

what am I?

English Translation

am I
I am alive
alive?

plastic
my body

electronic
am I?
my
body

I am alive
am I
am I alive?

plastic
my body
am I

electric
my body
am I
my body
(electronic)
my body

what am I?

06 — Effacée (Faded)

We're a thousand stories over
Taking ashes back in time
Coming back to every hour
Everything is passing up a line

Waiting for the sun to rise
Giving me the time
Waiting for the sun to rise
Waiting for the light

Waking up into the night now
Other worlds are having fun
Over making all the things right
We're making both and might be just fine

Waiting for the sun to rise
Giving me the time
Waiting for the sun to rise
Waiting for the light

I was here

before the light
before the name

I was here

before the room
forgot my face

I carried the dark
under my skin

I buried the voice
but it came back in

I was here

before the song
forgot my name

08 — Nous Savons (We Know)

Original Lyrics

je pose un verre pour toi
notre feu brûlait déjà
le vin se souvient de nous
on buvait dans ce feu-là
on disait que c'était nous

quand les fils tombaient dans le bleu
on disait seulement ce qu'on savait

We know!
tiens bon, mes chers...
et sois—

we... know

je laisse le verre
où nous restions
la flamme brûlait encore
le vin oubliait
ce que nous étions
mais brûlait comme ça

on disait que nous...

savons-nous

we know

English Translation

I set a glass for you
our fire was already burning
the wine remembers us
we drank in that fire
we said it was us

when the sons fell into the blue
we said only what we knew

We know!
hold on, my dears...
and be—

we... know

I leave the glass
where we remained
the flame was still burning
the wine forgot
what we were
but burned like that

we said that we...

do we know

we know

09 — Libre (We Are) Reprise

Original Lyrics

on a laissé la lumière
on a laissé tout derrière
on disait rester
mais on est partis

je te regardais

La Lumière Effacée

Project Closing Notes: Highest-Value Adds

This closing section captures the major gains from the recent work: the album moved from a set of promising bilingual track experiments into a coherent French rock-opera/art-rock album world with a fixed title, a clear symbolic vocabulary, a stronger dramatic sequence, and a practical production path for finishing the remaining pieces.

1. Album identity locked

The project now has its governing title: La Lumière Effacée. That title is doing real conceptual work. It combines the album's central light image with erasure, loss, memory, survival, and disappearance. It is elegant, French, emotionally legible, and broad enough to hold the full range of the record: dance, anthem, dark-path ritual, body-horror electronics, ghost-procession, and reprise.

2. The project became a French rock opera / art-rock concept album

The most important creative upgrade was the shift away from treating the songs as isolated bilingual experiments. The album is now a dramatic world. Each song can be judged by its role in the larger arc: awakening, descent, revelation, liberation, embodiment, erasure, communal recognition, and return. That framing also gives permission for contrast: a dance-forward opener can coexist with a slow procession like Effacée because they serve different dramatic functions.

3. A consistent symbolic system emerged

The recurring symbols are now stable: light, darkness, erasure, remaining, being seen, freedom, knowing, return, body, and voice. These are not decorative motifs anymore; they are the album's grammar. The songs repeat and transform these images so the listener feels they are moving through the same emotional architecture from different angles.

4. The track sequence gained a real arc

The current sequence has a strong emotional progression. Allumée opens with light left on and identity still present. La Piste Sombre moves under that light into shadow. Le-loomi-nai introduces exposure and revelation: we are seen. Libre gives the first major release into freedom. Le Livre des Morts turns inward toward body, technology, death, and aliveness. Effacée becomes the ghost-core of the album. Nous Savons makes the grief communal. Libre Reprise brings the freedom theme back with accumulated meaning.

5. Effacée became emotionally essential

Track 06 is now the album's faded procession rather than a beat-forward song. Its English lyric — "I was here," "before the light," "before the name," "before the song forgot my name" — gives the record a still, haunted center. It functions like the album looking directly at disappearance without trying to solve it. This is one of the strongest conceptual anchors in the project.

6. Libre / We Are became the anthem and reprise engine

Libre carries the big release energy: freedom, departure, recognition, and forward motion. It also gives the album its most obvious crowd-facing hook through "we are free." The reprise matters because the phrase can return later changed by everything the listener has passed through. In the first appearance it is liberation; in the reprise it can feel like survival, defiance, or a fragile victory.

7. The bilingual framework became repeatable

The strongest bilingual method is now clear: French carries atmosphere, ritual, ambiguity, and motion; English lands the emotional blows. The key English phrases — "I am still," "we are seen," "we are free," "we know," and "I

was here” — punch through the French haze exactly where the listener needs direct contact. This is better than literal translation because it creates a musical and emotional division of labor.

8. The Suno workflow became more practical and less dependent on luck

The recent work clarified that the best path is not waiting for one perfect generation. The better method is to generate sections, stems, alternate takes, hooks, backing vocals, and SFX ideas, then splice or overdub strategically. That turns Suno from a slot machine into a production partner. The album can now be finished through targeted interventions instead of endless full-song regeneration.

9. Production value targets are now specific

The remaining high-value production moves are focused: lead guitar hooks, chorus-like riffs, backing vocal chants, atmospheric SFX during gaps, reprise callbacks, better stem choices, and careful arrangement decisions. That is much stronger than vague “make it better” prompting. The album now has a punch list of musically meaningful improvements.

10. The lyric book became a real project artifact

The bilingual lyric book is no longer a scratchpad. It is now the textual foundation of the album: lyrics, translations, structure, and closing rationale in one place. It can support production decisions, cover art direction, sequencing, credits, future PDFs, and final packaging. This document closes the development phase as a success rather than leaving the work scattered across chat fragments.

Closing assessment: this stopped being “songs in French” and became a coherent album world.
